Statement

Building and creating drives me forward, whether it is websites, music, or bicycles. As a full-stack web developer, I apply my creative and mechanical talent by developing websites that are fluid, well-managed, and empower the user. I thrive when breaking down complicated ideas and constructing them into something efficient and enjoyable.

Skills

- JavaScript (jQuery, ReactJS), HTML, CSS, Less, Sass
- Amazon AWS EC2, Git, Github, Heroku
- Node.JS, NPM, Express.JS, MongoDB NoSQL, MySQL
- Blackbaud Convio Luminate, Luminate CMS, Teamraiser, Drupal

Experience:

Web Developer, National Specialist Chicago, IL American Lung Association (June 2016-Present)

- Engineer JavaScript front-end applications using Vanilla, jQuery, ReactJS
- Maintain AmazonAWS EC2 server using Node.JS for MySQL database API calls
- Program dynamically loading content (events, resources, related items) using AJAX, promises, async/await
- Design and build user-interface features that improve the user experience when navigating content
- Develop wireframes and mockups provided by UX Designer
- Build and maintain refreshed versions of already existing apps through reverse engineering & problem solving
- Develop series of interactive charts using Highcharts.js API for first ever State of Lung Cancer national report
- Establish GitHub best practices for the organization
- Train content specialists in HTML, CSS, and basic JavaScript

Student Web Developer Chicago, IL General Assembly (Feb 2016 - May 2016)

- Immersed in 80+ hours per week of programming; created in-depth projects available for use online
- Developed a MERN full-stack application in Node.js with multiple controllers in Express.JS & MongoDB
- Developed the back-end controllers in Node.JS in a group-authored app categorizing user-submissions of art
 - Lead the team as git manager, instructed team of four on git maintenance
- Developed a Travel Safety App named Caspian utilizing Ruby/Sinatra and PostgreSQL
 - Enhanced productivity through partner-programming and git organization
- Built a front-end based ear-training game utilizing JavaScript, jQuery, and Sound API with interactive keyboard

Bike Mechanic and Sales Associate Chicago, IL Play it Again Sports (January – December 2015)
